

PAKISTAN HONEY

TRADE DEVELOPMENT AUTHORITY OF PAKISTAN

TDAP INTRODUCTION

Trade Development Authority of Pakistan is the premier trade promotion organization mandated to develop and promote products and services of the country in international markets.

TDAP implements policies and directives of Federal Government and its Board of Directors for enhancing, promoting and facilitating trade.

TDAP supports and facilitates businesses through latest information and capacity building initiatives to enhance and improve their leverage in international trade.

To achieve its objectives, TDAP organizes as well as participates in local & international trade fairs, country specific exhibitions, trade delegations, conducts seminars and organizes contacts and information exchange events both physically as well on digital platforms.

This publication is part of the efforts of TDAP to share details and showcase Pakistan's products and services in international markets.

PRODUCT PROFILE+HS CODE

Honey is an important nutritive food containing various kinds of sugar, protein, free amino acids, minerals, trace elements, enzymes and vitamins with a fairly high caloric value. Its main sugars – laevulose and dextrose are absorbed directly into the blood and provide rapid energy. Around 400,000 colonies producing more than 10,000 metric tons of honey annually. Four species of honeybees are found in Pakistan. Three are indigenous and one is imported and established in Pakistan. These species are present in different ecological areas of the country. The indigenous species are *Apis dorsata*, *Apis cerana*, and *Apis florea*. The occidental species is *Apis mellifera*. Honey Production is proposed to be located at areas where wild plantation and crop farming is common.
